13. Describe the problem to be mitigated: \*Include past occurrence and how often they occur.

Between 1923 and 1993, 14 major wildfires occurred in the east bay hills, burning over 11,000 acres, destroying 3,500 homes and causing 25 deaths. The 1991 Oakland Tunnel Fire set a tragic record only surpassed in by the Southern California fires. The 1991 fire still stands as one of the highest destruction of California homes per acre. The East Bay Hills' combination of hot dry summers, wind-conducive topography, flammable vegetation, dense urban development, limited fire-fighting access, and Diablo winds comprises these continuing

14. Describe the scope of work: Describe in detail the proposed mitigation activity. Explain how the activity will problem(s), and provide the level(s) of protection. Include a description of the desired outcome and methodolo proposed activity, alternative solutions evaluated, and objective to be achieved.

The project will reduce fire hazard on publicly-owned lands in the East Bay's wildland-urban interface to an acceptable level of risk. Furthermore the project will preserve aesthetic landscape values for park users and neighboring communities, provide a menu of options for wildfire fuels management and habitat restoration and maintenance to address a variety of topographic situations, vegetation types, available tools and techniques (such as hand removal, mechanical control, herbicide application, and grazing) over time, evaluate the

15. Performance Period (Not to exceed 36 Months):

\*NOTE: For LHMPs, you must include at least 6 months for OES and FEMA review and approval process.

36 months

16. Does this project include National Flood Insurance Program (NFIP) Properties? 

No OYes

17. Duplicate Programs:

Is this activity eligible for funding from another federal program such as the NRCS Emergency Watershed Protectic FEMA Public Assistance Program, and the US Department of Agriculture/Department of the Interior Healthy Forest Restoration Act of 2002?

O Yes 

No O Uncertain

If yes, identify the program and the Disaster Survey Report, Project Worksheet, or application number(s).

18. Local Hazard Mitigation Plan Requirement (For Projects Only):

Provide a narrative that identifies how the proposed project activity is in conformance with your FEMA-approved Louising Mitigation Plan (LHMP). Any references to the LHMP must include the page number and/or section.

The project locations in Claremont Canyon (130.38 acres) and Tilden Parks (194.19 acres) are part of the East Bay Regional Park District's Wildfire Hazard Reduction and Resource Management Plan - Chapter 7, Part 7, Section 3, Pages 7-17.

The Plan, as adopted, is available in its entirety on the District's website in the Stewardship/Resources section under Wildfire Hazard Reduction. The website includes a detailed location map of all of the

NOTE: All Subapplicants submitting mitigation projects must have a FEMA approved LHMP by the FEMA application deadline and at time of obligation in accordance with Title 44 CFR Part 201.  20.
